

Wallace Technology Consulting

Services & Engagement Guide

diana-wallace.com · Atlanta Metropolitan Area

Independent advisory for teams that need enterprise-grade technical documentation, developer experience, and AI-enhanced content workflows built right, without the overhead of a full-time hire. Every engagement starts with a scoping conversation, so the work below reflects typical structure and starting ranges rather than fixed pricing.

Enterprise Readiness & Documentation Architecture

For teams that need to scope, document, and justify complex technical deployments, the same enterprise documentation and readiness work that has supported Fortune 500 telecommunications and SaaS engagements.

Full Engagement

- Current-state and future-state requirements documentation
- Client-facing pitch decks and process documentation
- Readiness framework build-out and stakeholder alignment materials
- Scoping support that justifies contract value to leadership or clients

Starting at \$5,000, scaled to project complexity

À la Carte

- Requirements documentation only — \$1,500–\$2,500
- Level of Effort (LOE) estimate only — \$1,500–\$2,000
- Documentation audit / gap analysis — \$2,000–\$3,500

AI-Enhanced Workflow Implementation

For teams that want to use AI tools well, not just adopt them. Built on hands-on experience integrating Claude, Gemini, and NotebookLM into real documentation and content pipelines.

Full Engagement

- End-to-end workflow design integrating AI tools into an existing documentation or content pipeline
- Docs-as-code pipeline setup with AI-assisted drafting and human-in-the-loop review
- Team training and onboarding to the new workflow

\$2,500–\$6,000, or \$150–\$200/hour for scoped advisory work

À la Carte

- AI tool evaluation and recommendation for a specific use case — \$1,000–\$1,800
- One-time workflow setup and training session — \$750–\$1,500
- Prompt templates for a specific repeatable task — \$500–\$1,200

Fractional Technical Enablement Advisory

Ongoing, retainer-based support for teams that need senior-level documentation and readiness expertise periodically, without a full-time hire.

\$2,000–\$4,000/month, scoped to weekly hours and engagement depth

How Engagements Work

-
1. **Scope** — A focused conversation to understand the gap: what's broken, what's missing, what's slowing the team down.
 2. **Build** — Documentation, frameworks, or readiness systems built to the same standard used for Fortune 500 enterprise accounts.
 3. **Hand off** — Clean, maintainable deliverables your team can own and extend without ongoing dependency.
